

```
fn_traits::function  
_traits< T >
```

A diagram illustrating a relationship between two function trait types. A light gray box at the bottom contains the text 'fn_traits::function' followed by '_traits< const T && >'. A blue arrow points vertically upwards from the bottom box to a white box at the top. The white box contains the text 'fn_traits::function' followed by '_traits< T >'. This represents a specialization or inheritance where the const-referenced version is a more specific instance of the general version.

```
fn_traits::function  
_traits< const T && >
```
