

```
fn_traits::function  
_traits< R(Args...)>
```

A diagram illustrating the inheritance of a function trait specialization. A light gray box at the bottom contains the code for a volatile specialization of `fn_traits`. A blue arrow points upwards from this box to a white box at the top, which contains the code for the general `function` specialization of `fn_traits`.

```
fn_traits::function  
_traits< R(C::*)(Args...) volatile >
```
